1) RMLs is Removal Management Levels

2) We can use 31,000 cubic yards, but that could/will change based on the final cleanup action levels

3) I will have to refer this one to Gary Moore

Jeff: We are looking at the data, have some questions:

- <!--[if !supportLists]-->1. <!--[endif]-->What does the EPA RML stand for?
- <!--[if !supportLists]-->2. <!--[endif]-->What is the estimated volume of pit waste?
- <!--[if !supportLists]-->3. <!--[endif]-->What is your preferred comparison value?
We are assuming the EPA RML, and understand you are listing comparison values, but what would be EPA's preferred criteria?

We will send you additional comments later.

Thanks, John

Todd,

EPA OSC Gary Moore has requested that I contact LDEQ and ask you guys if there are some specific clean-up criteria/action levels that should be observed for removal or stabilization activities at the Delta Shipyards site. I've attached a copy of the sample data tables for your review along with the Sample location map. As you review the data, note that the first five characters of the sample name indicate the sample location. I've also attached a word document that explains all the sample nomenclature. Please let us know something as soon as you can. We will then submit some waste samples for Treatability Tests based on the input we receive from LDEQ.

Let me know if you need anything else.

9522480

Thanks,
